Subject: Shelf Life Guidelines - Tagatose

January, 2024

To: All Domino Foods, Inc. Valued Customers:

Please be advised the shelf life for Tagatose has been re-evaluated and changed from 24 to 36 months based on on-going, real time evaluation of the product.

Products should be evaluated for suitability of use at the end of the shelf life period assigned to each material.

The shelf life of tagatose may be affected negatively by adverse storage conditions, such as significant or rapid changes in temperature, and/or humidity. When storing products in a region with a different climate from where they're manufactured, the desired storage conditions are <80°F and <70% RH. Products should never be stored in refrigerated or frozen conditions.

TAGATOSE - POWDERED

36 Months

We trust this information is sufficient. Should you require additional information, please feel free to contact us at QualityDocs-NA@asr-group.com.

Sincerely,

S. Michael Burchell
Senior Director Global Corporate Quality
